

Technical Library

The Hanford Technical Library serves staff members of the U.S. Department of Energy (DOE) Richland Operations Office and its prime contractors at Hanford. In addition to the extensive collection of books, journals and reports, the Technical Library provides a broad range of informational services performed by a staff skilled in retrieving information for scientific study. These services are of two types:

General services, furnished without fee, include

- collection and organization of library materials
- circulation of books and reports
- reference assistance
- announcements of new library resources
- tours and orientations.

Special services, provided on a cost-recovered basis, include

- literature searches (providing specific facts or bibliographies)
- continuous alert service (keeping researchers current on literature in their field of study)
- purchase of information materials for office use
- photocopies of library materials
- interlibrary loans
- language translations
- assistance in organizing reference collections.

These services are available to help all Hanford employees acquire the scientific and technical information they need to carry on their research. The following pages describe each of the services in detail.

General Services

(no fee)

Collection and Organization of Library Materials

The Technical Library's resource collections are housed in the *Main Library* (3760 Building) and the *Life Sciences Branch Library* (331 Building), both located in the 300 Area.

The *Main Library* has 95,000 books and bound journal volumes and 1,500 different periodical subscriptions in the *Books and Periodicals* section. These materials deal with basic science and technology, as well as energy-related fields, particularly nuclear science. The books are arranged by the Library of Congress classification system and indexed by title, author and subject. The Library is currently converting its catalog to microfiche format, and copies of the microfiche are located throughout the Hanford Site. Current issues of periodicals are displayed on shelves; back issues are bound and stored in the open stacks or trailer annex.

Approximately 500,000 reports—100,000 printed publications and 400,000 reports on microfiche—are stored in the *Technical Report Files* section of the *Main Library*.

Library staff can help you locate the information you need.

The collection, arranged by report number, includes documents from AEC/ERDA/DOE, NASA, the Department of Defense, and foreign atomic energy agencies. Staff at the Information Desk in the Books and Periodicals section will assist you in identifying report numbers; Technical Report Files staff will help you locate report copies. Some of the reports are classified or have limited distribution; access to these reports is handled through the appropriate document control procedures.

The *Life Sciences Branch Library* houses a collection of 1,000 books and 200 periodical subscriptions in the biological, environmental, and medical sciences. The Library has a number of index and abstract publications and has access to computer indexing systems such as MEDLARS and BIOSIS. Most of the general and special services, including circulation, literature searches, and photocopying are available.

Circulation of Books and Reports

Hanford staff may borrow most books and reports for 4-week periods, either by checking them out in person or by making a mail or telephone request. New books are loaned for 2 weeks; reference materials and periodicals are restricted to use in the Library.

If you request a book or report that is out on loan, your name will be placed on a reserve list and the item will be sent to you as soon as it is available. Reports on microfiche are provided in duplicate microfiche. Full-size paper copies can be printed from the microfiche for a fee to cover the cost.

The Library staff routinely reviews and selects books for acquisition that are useful to the various Hanford research programs. Suggestions for new books, by title or subject, are welcome.

Reference Assistance

The staff at the Information Desk will help you locate materials by using the catalog, periodical lists, indexes, and various abstracting journals. They will also answer

brief reference questions by checking directories, dictionaries, handbooks, and other sources. This service can be handled in person or by mail or telephone.

Announcements of New Library Resources

To announce the arrival of new books, reports and subscriptions, the Library distributes two types of bulletins and information on journal contents. The *Library Bulletin*, published monthly, lists books and subscriptions recently added to the collections in the Main Library and the Life Sciences Branch Library. The *Report Files Bulletin* is available as two separate publications. One lists newly acquired full-size reports; the

other lists newly acquired microfiche reports. As new journal issues are received, the Library staff can provide information on the tables of contents. Contact the Library to put your name on any of the distribution lists.

Tours and Orientations

Hanford employees are encouraged to become better acquainted with the Technical Library through a tour of the facilities. Individuals may ask staff at the Information Desk to show them around; for large groups, contact the Library to arrange for a tour. Library staff are also available to meet with groups at their offices to discuss Library services and how they can benefit research

A continuous alert service routinely provides a computer listing of current literature to keep you informed of research progress.

Special Services

(cost-recovered)

Literature Searches

A literature search is one of the special services provided by the Library's reference specialists. These professionals act as valuable members of the research team to save you time and money with their subject knowledge and extensive experience with computerized information retrieval systems.

reports, symposium papers, and other publications on a specific subject to a short list of reports by one author.

Using more than 200 topical data bases, including Chemical Abstracts, Engineering Indexes, and Metals Abstracts, the reference specialists have access to information beyond the Library's local resources. They also check computer indexes of DOE, NASA, Department of Defense, NIH, and patent literature. Information on most scientific, technical, business, and economic literature is available on-line, covering materials from about 1970 to present. For material published before 1970, the Library maintains printed copies of many of the indexes.

Although a literature search can be requested by telephone or mail, Hanford staff members are urged to meet personally with a reference specialist. In this way, the task can be defined and time and costs for the search can be projected.

Continuous Alert Service

Reference specialists help you keep up to date on publications in your specific areas of technical interest. A continuous alert

The formal service, a Selective Dissemination of Information (SDI), provides a computer-printout list of current publications related to a research topic. The reference specialist establishes an on-line search profile and stores it in the computer system. Updated information is automatically furnished to you as it becomes available.

From the informal service, you regularly obtain information on journal contents, citations, or copies of recently published abstracts and articles relating to your fields of interest. In addition, the reference specialist will scan publications as they arrive at the Library, identify articles of interest, and send you copies.

Purchase of Resource Materials

The Library orders books, periodical subscriptions, reports, and other informational materials for Hanford employees. To request an item, check first with your company on its purchasing requirements, then fill out a

Request for Technical Information Services and/or Materials form (Procurement Card) and give it to the Library. The Library will place the order, taking advantage of all available discounts, and send the item to you.

Photocopies of Library Materials

The Library provides photocopies of single journal articles, short reports, or parts of books. Requests for this service are made with a Procurement Card.

By obtaining publications on microfilm, the Library stores extensive collections of information. Microfilm reader-printers allow easy reading.

Interlibrary loans

Through interlibrary loans, Hanford employees have access to practically any published resource they may need. The Technical Library frequently arranges short-term loans of material from libraries throughout the country. If material cannot be loaned, libraries often will provide a photocopy (in accordance with Federal copyright regulations) of the chapter, article or document. To arrange for an interlibrary loan, furnish a completed Procurement Card.

Translations

The Library subscribes to a number of cover-to-cover

translations of foreign journals and has listings of articles and reports that have been translated into English. Library staff will arrange for internal or commercial translations of material into English or a foreign language.

Assistance in Organizing Reference Collections

The Library advises individuals or groups on the organization of their information files or reference collections. The extent of the consultation varies according to the needs of each situation. To arrange for this type of assistance, contact the Library.

19. Title of the series and book volume number if the book is one volume in a series
20. Book publisher
21. Book call number (from catalog), if available

To Request a Conference Paper:

Fill in 1 through 17 and

20. Name, date, place of the conference, and publisher of the proceedings/paper

Library Locations in the 300 Area

Other Libraries

In addition to the Hanford Technical Library, specialized collections are established in other area libraries including the following:

Hanford Environmental Health Foundation

Library
3080 George Washington Way
Room 80
376-6125
7:15 to 11:15
Monday through Friday

The Environmental Medical Library was established primarily for staff of the Hanford Environmental Health Foundation. The reference collection contains books, periodicals, manuals, pamphlets, and technical bulletins related to the medical and environmental health sciences.

Rockwell Hanford Operations

Rockwell Hanford Legal Library
Federal Building, Room 146
376-6807
7:15 to 4:00
Monday through Friday

The Rockwell Hanford Legal Library is maintained for Hanford contractors' legal staff members. A Lexis terminal is available. The collection includes approximately 5,500 volumes of legal reference books, journals, the Federal Register, the Congressional Record, and the Code of Federal Regulations. Some records of Congressional hearings are also available.

Kaiser Engineers Hanford Company

Kaiser Library
Federal Building, Room 249
376-6941, 6052
7:00 to 3:45
Monday through Friday

The Kaiser Library maintains files and current indexes of standards and specifications from government and non-government agencies, such as the Department of Defense, NASA, and the National Bureau of Standards, and from professional and trade societies such as IEEE, ANSI, ASME and ASTM. A collection of manufacturers' guides and catalogs is also available.

Hanford Science Center

Energy and Environment Library
Federal Building
376-6374
8:00 to 5:00
Monday through Friday;
9:00 to 5:00
Saturday;
12:00 to 5:00
Sunday

Reading Room (137)
8:00 to 12:00 and
1:00 to 5:00
Monday through Friday;
9:00 to 5:00
Saturday

The Energy and Environment Library provides non-technical energy information to the public. The resources are divided into three collections: 1) the Department of Energy Public Document Reading Room, 2) the Energy Environment Curriculum for Educators, and 3) the general energy collection of books and periodicals. An energy environment film and video loan program is available free of charge.
